Exp. Name: Write a C program to find the Factorial of a given number using Recursion

Aim:

Write a program to find the factorial of a given number using recursion process.

At the time of execution, the program should print the message on the console as:

```
Enter an integer :
```

For example, if the user gives the **input** as:

```
Enter an integer : 6
```

then the program should **print** the result as:

```
Factorial of 6 is : 720
```

Note: Write the recursive function **factorial()** in (Program901a.c).

Source Code:

Program901.c

```
#include <stdio.h>
#include "Program901a.c"
void main() {
   long int n;
   printf("Enter an integer : ");
   scanf("%ld", &n);
   printf("Factorial of %ld is : %ld\n", n ,factorial(n));
}
```

Program901a.c

```
long int factorial(long int n);
long int factorial(long int n)
{
   if(n==0)
   return 1;
   return(n*factorial(n-1));
}
```

Execution Results - All test cases have succeeded!

```
Test Case - 1
